

Hosting animated website using Apache

With using apache, its possible to host a animated webpage which is not possible with nginx.

Configure in apache loaction: /var/www/html

- `sudo nano /var/www/html/index.html`

Here is the index.html code to apply

```
<!DOCTYPE html>
<html>
<head>
  <title>My Animated Page</title>
  <style>
    body { text-align: center; background: #f0f0f0; }
    .box {
      width: 100px; height: 100px; background: coral;
      margin: 100px auto;
      animation: move 2s infinite alternate;
    }
    @keyframes move {
      from { transform: translateY(0); }
      to { transform: translateY(50px); }
    }
  </style>
</head>
<body>
  <h1>Hello from my server!</h1>
  <div class="box"></div>
</body>
</html>
```

- `sudo systemctl restart apache2`

The below mentioned is only a example and were apache can do far beyond this
